

Great new place to savor springtime wining and dining!

The patio at **Dallas Chop House** is the place to be on these great spring evenings! If you haven't been yet, you are in for a treat. The downtown restaurant has been open about 4 months and Chef **Kenny Mills** and GM **Steve Occhipinti** have gotten the food and service fine-tuned. We're talking great steaks and seafood and a very appealing lunch menu featuring those and some tasty soups, salads, sandwiches. And, popovers to live for! (think Neiman-Marcus Zodiac Room). Now that the weather is outdoor perfect, it's a great time to take advantage of the beautiful space they have created just off the snazzy bar at Dallas Chop House. It's like an oasis at the bustling downtown corner of St. Paul and Main Street. Enjoy lunch, dinner, or drinks and appetizers with friends under the pergola. I have a feeling they will keep the place cool in the summertime! Dallas Chop House is the latest venture from **Dallas Restaurant Group**, which also owns **Dallas Fish Market** and **Go Fish Ocean Club**. **John Tesar**, formerly with the **Mansion on Turtle Creek**, has joined them as culinary coordinator. Look for new concepts to be rolled out by the group in the coming months.
